# Get track on receipts and credit cards

**Continia Expense Management is a peaceful revolution in the market for travel expense solutions. Besides the attachment registration, administrative tasks are performed directly in Microsoft Dynamics NAV.**

**This makes it easier for the accounting department to manage the completion of expense reports, without the necessity to invest in an external system for the purpose.**

**You stay in Microsoft Dynamics NAV, as you know!**

## **Register!**

Using the Continia App for iPhone, Windows Phone and Android, you can easily and quickly capture receipts with data and send them directly to Dynamics NAV. Then you are already finished and without further doings!

Furthermore, mileage and allowance registration\* are also included.

## **Match!**

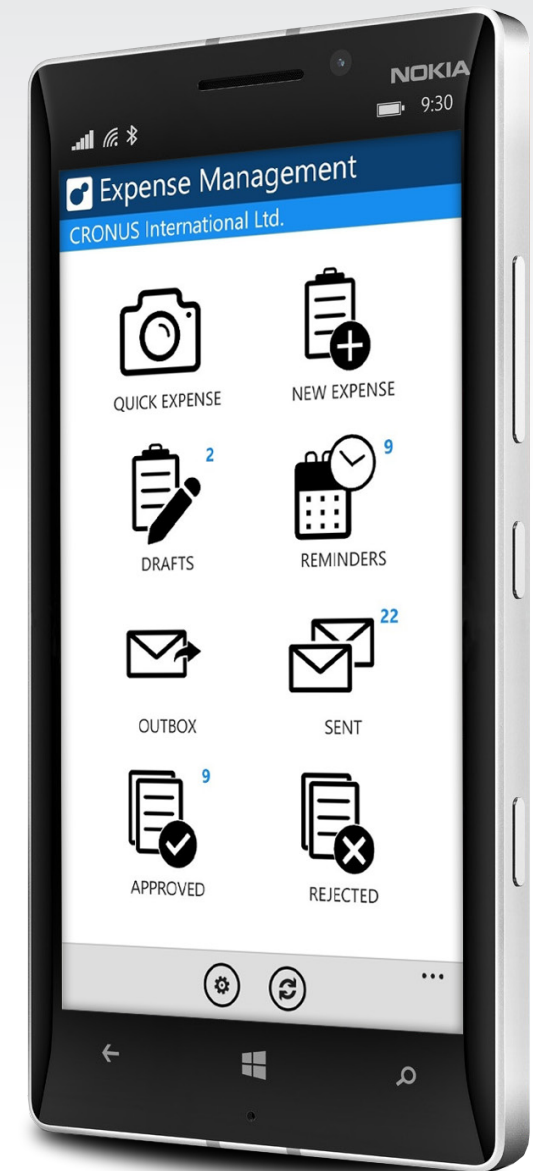

Continia Expense Management makes it possible to import employees' credit card usage and

connect each supply line automatically with the registered attachments. This makes it possible automatically to get an overview of which expenses where attachments still are missing — and from whom...

## **Approve!**

Travel expenses can be approved using a NAV client or the Continia Web Portal\*.

\*: This feature is not available in version 1, but will be included in a future release.
